

# The great deal is the Laser Processed Consumables (Lenses and nozzles)!

## Various Reasons!!

- **Knockout price! 50% off of maker-listed price.**
- **Instant delivery**
- **High quality, high efficiency, and high sensitivity**
- **Number 1 domestic sales share**
- **Time-proven business with over 2000**
- **companies in Japan**
- **No shipping charge in Japan**
- **Free nozzle sample**
- **Correspondence for all makers and all models**
- **Number 1 Share**

**No more wasteful spending!  
We help you to lower the costs.**

---

1 : Depending on nozzle type, we offer products with half price of genuine goods in average. Some are even 80 % off. Please contact us for more detail for each product.

2 : Our products correspond for all makers and all models of nozzles. All nozzles and lenses are off the shelf. Therefore if you order before 3 p.m., we can ship on that day.

3 : We have 45 years of experience in the industry and proud of our precious machinery process technology. Every day we manufacture highly sensitive products in our high quality control system.

4 : Our sales of laser processed nozzles and lenses are number 1, being away from the competitors.

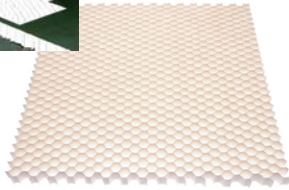

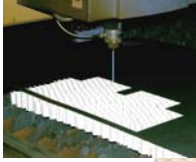

5 : We supply more than 2000 customers now, and the number continues to increase. Also our sale area is all over Japan, from Hokkaido to Kagoshima, in 45 prefectures (in August 2008).

6 : We ship for free, even for one nozzle. That service can be offered only here.

Genuine goods manufactures and other companies in the same trade sell by lots or charge about 1000 yen as shipping fee.

7 : We supply free nozzle sample for first-time customers.

We have full confidence in our manufacturing technique, and so as sample nozzles.

### Ceramic Honeycomb

For thin parts process, for fine work process, and for scratch free process. Nonflammable due to unburnable material used for scratch resistant coating. Also great to maintain flat surface.

### Antireflection Agent

Any trouble by reflection during laser processes? Try this brushing antireflection agent with aluminum, copper, and brass!

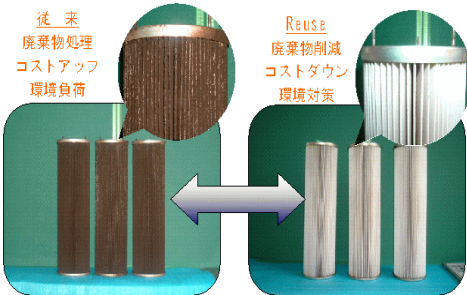

### Anti-Spatter Sheet

Using expensive fabric sheet to protect from welding and thunder spark still now?  
1/10 of fabric sheet cost. User friendly?manipulatable with a scissor.

### Laser Non-Dross

Any difficulty to remove dross coming upon laser processes? Use this spray to eliminate dross easily.

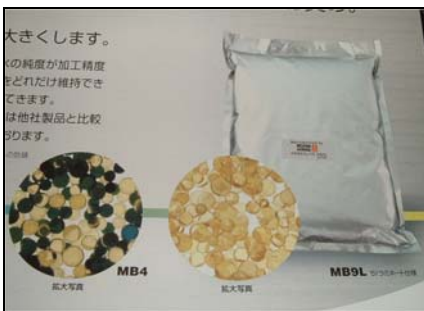

### Cleaning and Recycling Dust Collector Filter

Is dust collector filter disposable? No! Let us wash as good as new. Be nice to environment and ecology by recycling. Reduce garbage and cost of consumable goods!

### Adsorption pads for auto material feeder by Trumpf

Wasting money to exchange pads? Save as much as you can for consumable goods.

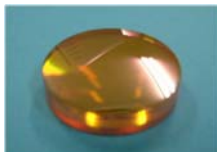

### Ion-Exchanger Resin

Two choices; ○1 Regular?changing color as deteriorated, ○2 In laminated pack?originally yellow having half year to one year life. Excellent products made by major companies in ion-exchanger resin field.

### CeramiShield

Spray at torch head for semi-auto welding and for robot welding. Harder for spatter to stick, and easier to remove spatters on. Long term protection due to ceramic coating. Huge performance difference from traditional anti-spatter agents.

Please feel free to contact us for inquiry, order, catalogs and samples.
